

KARTHIKEYAN VENKATESAN

iOS Mobile App Developer

karthivenkatesan.cse@gmail.com | www.linkedin.com/in/karthiiosdev | +91 9940852159 | 27-05-1998 | Salem (TN).

PROFESSIONAL SUMMARY

Senior iOS Engineer with 5+ years of hands-on experience building secure, scalable, high-performance iOS applications using Swift, SwiftUI, and UIKit. Strong expertise in Swift **Concurrency (async/await)**, **MVVM**, **REST API integration**, performance optimization. Proven ability to deliver enterprise-grade mobile solutions, ensure code quality through static analysis, and collaborate effectively with cross-functional teams.

SKILLS

- **iOS Development:** Swift, Xcode, UIKit, SwiftUI, iOS SDK, WebKit (WKWebView), App Lifecycle
- **Architecture:** MVC, MVVM.
- **Concurrency:** Async/Await, DispatchQueue, Actors
- **Data Binding:** SwiftUI Data Binding (@State, @Binding, @ObservedObject), NotificationCenter, Closures
- **Backend & APIs:** REST API integration, JSON parsing (Codable), third-party API integrations, Payment Gateway integration
- **Tools & Frameworks:** Firebase (Cloud Messaging, Analytics, Crashlytics), Git (Version Control), CocoaPods, Push Notifications (APNs)
- **App Delivery & UI:** App Store & TestFlight deployment, UI Design implementation.

WORK EXPERIENCE

Sawab Technologies, iOS App Developer - Salem

Mar 2021 - Present

- Developed and implemented new iOS app features based on client requirements, enhancing existing products using Swift and UIKit while ensuring stability and performance.
- Integrated **RESTful APIs (GET, POST, PUT, DELETE, MULTIPART)** for real-time data synchronization and robust backend communication.
- Implemented Firebase services, including **Authentication, Cloud Messaging (FCM), Analytics, and Crashlytics**, to improve user engagement and monitor production issues.
- Managed App Store and TestFlight releases, including build generation, code signing, and release submissions.
- Followed **MVVM/MVC/JSON architecture, reusable components, and clean code practices** to ensure maintainability and scalability.
- Implement Major Payment gateways **Razorpay, Tamara, Tabby, Apple Pay, Payfort**.

NDOT Technologies, Junior Software Associate - Coimbatore

Jun 2019 - Mar 2021

- Developed and implemented new iOS app features based on client requirements, enhancing existing products using Swift and UIKit while ensuring stability and performance.
- Integrated Google Maps services to enable live location tracking and map-based user features within the application.
- Maintained the product through regular bug fixing, issue analysis, and performance improvements to ensure smooth production releases.
- Performed white-label customization for client-specific builds and handled App Store uploads, including configuration, code signing, and release submission.

PROJECTS

DAANAH - E-commerce / Fashion / Payments

Tech Stack: Swift,Storyboard,UserDefaults,Firebase,Apple Signin,UIKit,Google Maps,REST API

- Developed a highly customizable mobile application with multiple fabric, color, and style options, including offer grouping and deep linking for seamless navigation.
- Implemented full **Right-to-Left (RTL)** UI support, ensuring accessibility and localization for diverse regional users.
- Integrated social media login and registration, enabling fast and frictionless user onboarding.
- Built a secure account deletion flow and configurable app architecture to meet privacy standards and evolving business requirements.

BRINGO - Customer / Driver / Chat System

Tech Stack: Swift,Storyboard,Firebase,UIKit,WebSockets,JSON Models,Google Maps,REST API

- Developed a multi-role mobile application supporting customers, drivers, and vendors, enabling seamless order management and role-based workflows.
- Implemented a real-time chat module using **WebSockets** for scalable, responsive communication between users.
- Designed robust data model decoding using **Codable**, **CodingKeys**, and extensions to handle dynamic type conversions safely.
- Integrated live map tracking with real-time driver location updates using maps and WebSockets.

MATHOUN - Marriage Booking For Brokers

Tech Stack: Swift, Flutter Migration, UIKit,REST API.

- Implemented availability management, allowing service providers to define available dates and enabling customers to create bookings accordingly.
- Developed subscription-based booking with plan limits, booking counts, and validity-based access control.
- Supported date alignment using both Hijri and Gregorian calendars to ensure accurate scheduling across regions.
- Led Flutter migration adoption, recreating existing features with full parity using AI-assisted tools to accelerate development.

My Jain Universe - Jain Calendar

Tech Stack: SwiftUI, SPM, Codable, Localization.

- Developed My Jain Universe, a login-based mobile application with Google Sign-In and full multilingual support (English, Gujarati, Hindi).
- Implemented Jain calendar events, group reminders, and habit-based daily tracking with scheduled notifications.
- Built timezone-aware timeline views, dynamically updating based on current location and location changes.
- Integrated third-party APIs for accurate time calculations and region-specific event scheduling.

EDUCATION

- Bachelor of Computer Science and Engineering - Anna University - 2015 - 2019 - 65 %
- HSLC - State Board of Tamilnadu - Computer Science - 2013-2015 - 75 %
- SSLC - State Board of Tamilnadu - General - 2013 - 75%
